

Yasser Mohammad

Principal Researcher
Knowledge Science Research Labs, NEC

Professor
Assiut University, Egypt

Date of Birth: Sep. 7, 1976

Tokyo, Japan

+81-80-5652-4120

yasserm@aun.edu.eg

https://yasserfarouk.github.io

ORCID:0000-0003-2272-7254

Interests

- Automated Negotiation
- Time Series Data Mining
- Activity Recognition
- Robotics and HRI

Short Bio

Yasser received his PhD from Kyoto University in 2009. Since then he worked in universities, national research institutes, research companies and industrial research laboratories. He collaborated with experts in psychology, computer science, mathematics, robotics, HCI, HRI, machine learning among other fields. His research spans the area of applied AI with a focus on robotics and multiagent systems. Author of two books and over a hundred articles. A senior IEEE member, PC member and reviewer for AAAI, IJCAI, AAMAS, IROS, HRI, IEEE Trans. on System Man and Cybernetics, Social Robotics, Applied Intelligence, among many others. Main organizer of the SCML@ANAC running yearly in conjunction with AAMAS/IJCAI. Main maintainer of NegMAS and SCML.

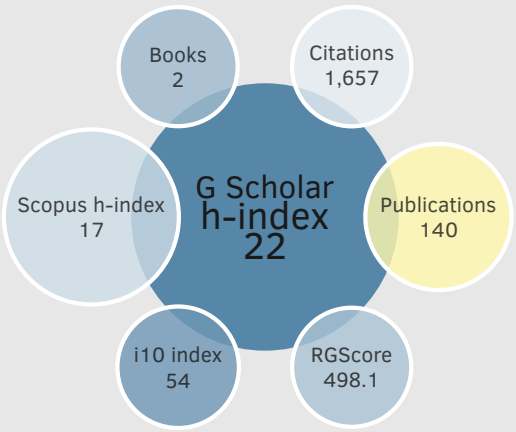

Industrial Experience

Jan, 2020 – ongoing	**Research Scientist**	**Knowledge Science Research Laboratories, NEC, Japan**
	Conducting research and developing systems in the areas of multi-agent systems and ML. Leading platform development and international cooperation in automated negotiation.	
Feb, 2020 – March 2026	**Specially Appointed Researcher**	**AIRC, AIST, Japan**
	Research in automatic negotiation specially preference elicitation.	
August, 2020 – July 2021	**Visiting Researcher**	**AIP, RIKEN, Japan**
	Research in automatic negotiation specially concurrent negotiation.	
Nov, 2017 – Dec, 2019	**Researcher**	**AIRC, AIST, Japan**
	Research in automatic negotiation.	
Jun, 2017 – Nov, 2017	**Data Science Advisor**	**Xtrava (xtrava.co), USA**
	Developing innovative real-time machine learning systems for biosensor data analysis.	
Nov, 2016 – Nov, 2017	**Chief Research Engineer**	**KDDI Research Inc. (kddi-research.jp) Japan**
	Conducting state of the art research in human behavior understanding using machine learning techniques. Applying pattern recognition and deep learning techniques to time-series data mining.	
Jan, 2007 – Mar 2009	**Technical Executive Officer**	**Ayonix Inc. (ayonix.com) Japan**
	Produced the complete first version of Ayofa SDK (A face detection/recognition SDK). Managed the development team of all products in the company.	
Apr, 2004 – Oct, 2005	**Developer**	**SCTU, Assiut Univ., Egypt**
	Developed Assiut University Information Systems Internet Portal and designed software for university automation.	

Academic Experience

Dec, 2022 – ongoing	**Professor (currently on leave)**	**Assiut Univ., Egypt**
	Teaching and conducting research in intelligent systems and participating in administrative efforts.	
Aug, 2016 – Dec, 2022	**Associate Professor**	**Assiut Univ., Egypt**
	Teaching and conducting research in computer and systems engineering and participating in administrative efforts.	
Oct, 2015 – Jun, 2016	**Adjunct Professor**	**E-JUST Univ., Egypt**
	Working as an Adjunct Assistant Professor for one day/week at Mechatronics and Robotics Engineering Department, Egypt-Japan University of Science and Technology (E-JUST), Egypt.	
Sep, 2012 – Aug, 2014	**JSPS Fellow**	**Kyoto Univ., Japan**
	Conducting research in imitation learning and its applications in robotics.	
Jul, 2011 – Dec, 2011	**GCOE Postdoc Visiting Researcher**	**Kyoto Univ., Japan**
	Conducting research in the applied intelligence dept. in collaboration with Prof. T. Nishida.	
Jan, 2010 – Aug, 2016	**Assistant Professor**	**Assiut Univ., Egypt**
	Teaching and conducting research in computer and systems engineering and participating in administrative efforts.	
Jun, 2005 – Dec, 2009	**Teaching Associate**	**Assiut Univ., Egypt**
	Assisting in teaching courses to students of Electrical Engineering, Mechanical Engineering and introductory Engineering courses and supervising graduation-projects	
Apr, 2000 – Jun, 2005	**Teaching Assistant**	**Assiut Univ., Egypt**
	Assisting in teaching courses to students of Electrical Engineering, Mechanical Engineering and introductory Engineering courses and supervising graduation-projects	
Sep, 1999 – Apr, 2000	**Teaching Assistant**	**Assiut Univ., Egypt**
	Assisting in teaching courses to students of Electrical Engineering, Mechanical Engineering and introductory Engineering courses and supervising graduation-projects

Personal

Yasser lives with his partner, a medical doctor, and three children in Tokyo since 2016.

Education

2006 – 2009 **Ph.D. in Informatics (AI)** — **Kyoto Univ. Japan**
Title: Autonomous Development of Natural Interactive Behavior for Robots and Embodied Agents.
AI | HRI | Unsupervised Learning | Time Series Analysis

2001 – 2005 **M.Sc. in Computers and Systems Engineering** — **Assiut Univ. Egypt**
Title: Anubis: A novel network authentication protocol.
Computer Security | Network Authentication | BAN Logic

1993 – 1998 **B.Sc. in Electrical Engineering** — **Assiut Univ., Egypt**
Graduation Project: Construction and control of a 2D robot for drawing applications.
Robotics | Automatic Control | Simulation

Review and Editorial Duties publons profile

Journals	New Generation Computing, Social Robotics, IEEE Trans. on Systems Man and Cybernetics, IEEE Trans. on Industrial Electronics, Neurocomputing, AI & Society, Applied Intelligence, among many others ...
Conferences	AAAI, IJCAI, AAMAS, IEEE ROMAN, IEEE HRI, IEEE IROS, DATA, IEA/AIE, ISIEA, PECON, ACHI, ICCCI, ICAS, KUI, ...
Organizer	SCM league of the ANAC competition in conjunction with IJCAI since 2019

Honours and Awards

Dec 2023 **Best Paper Award** — Kyoto, Japan
The 7th IEEE International Conference on Agents (IEEE ICA)

Jan 2021 **Finalist for the International Automated Negotiating Agents Competition (Genius track)** — Nagoya, Japan
International Joint Conference on Artificial Intelligence (IJCAI)

Nov 2020 **Runner for Best Paper Award** — Nagoya, Japan
The 23rd International Conference on Principles and Practice of Multi-Agent Systems (PRIMA)

Mar 2015 **Best Presentation Award** — Kitakyush, Japan
the 3rd International Conference on Industrial Application Engineering

Sep 2014 **Outstanding Paper Award** — Seoul, South Korea
ICROS International Conference on Control, Automation and Systems (ICCAS) 2014 (out of 337 accepted papers from 25 countries)

Sep 2012 **JSPS Fellowship** — Kyoto University, Japan
JSPS long term post-doc fellowship for foreign researchers (2012-2014)

Jul 2011 **GCOE Postdoc Fellowship** — Kyoto University, Japan
July-December 2011

Oct 2011 **Best Paper Award** — Kitakyush, Japan
IEEE SII 2012 (Control) (from 248 accepted papers)

Jun 2009 **Best Paper Award** — Tainan, Taiwan
the Twenty Second International Conference Industrial, Engineering, and other applications of Applied Intelligent Systems (IEA/AIE 2009). Acceptance rate was 29% out of 286 submitted papers (ranked 46th among top 701 computer science conferences)

Jun 2008 **Best Paper Award** — Wroclaw, Poland
the Twenty First International Conference Industrial, Engineering, and other applications of Applied Intelligent Systems (IEA/AIE 2008). Acceptance rate was 30% out of 270 submitted papers (ranked 46th among top 701 computer science conferences)

Teaching Experience

Undergradute Courses (Partial List)

Assiut University — **Electrical Engineering** — 2010–2015
Introduction to Computer Science, Numerical Analysis, Microprocessors, Computer Organization, Computer Architecture, Database Systems, Digital Signal Processing, Databases

Assiut University — **Mechatronics** — 2010–2015
Robotics Engineering

Assiut University — **Information and Computers** — 2010–2015
Graphical User Interfaces, Network Security, Computer Security, Microprocessors, Computer Organization

Postgraduate Courses (Partial List)

E-JUST University — **Mechatronics Engineering M.sc. and PhD** — 2016
Intelligent Control Systems

Assiut University — **Electrical Engineering M.sc. and PhD** — 2010–2015
Robot Motion Planning, Pattern Recognition, Probabilistic Inference, Data Sciences and BigData

Academic Supervision

2012–2016 — **Mostafa Abdallah** — M.Sc., AUN, Egypt
An Integrated ROS stack for Autonomous learning of Perceptual and Motion Primitives

2015–2020 — **Yomna Mohammad** — M.Sc., AUN, Egypt
Pattern Discovery in Time Series

2019–2022 — **Niang Yo** — M.Sc., Fraunhofer, ISC, Germany
Design of AI agent for Supply Chain Management using Deep Reinforcement Learning

2019–2022 — **Alyaa Sabra** — M.Sc., AUN, Egypt
Feature Selection for Face Recognition

2019–2022 — **Zaynab Ashraf** — M.Sc., AUN, Egypt
Text Mining tool for Genome Scale Metabolic Model

2021– — **Abdallah Ahmed** — M.Sc., EJUST, Egypt
Deep Learning for Robot Navigation in Dynamic Environments

Funded Projects

May 2014 — **Theoretical Framework for Interactive Game Design** — >10M JPY
Investigator — **Aerospace Research and Development (AFOSR/AOARD)** To establish a theoretical framework for achieving content-rich, proficient and reliable communication between people and robots.
Japan

Sep 2012 — **Fluid Imitation Learning** — 2.5M JPY
PI — **Japanese Society for Promotion of Science** To design, implement and evaluate an imitation engine for humanoid robots that achieves fluid imitation by autonomously discovering interesting motions to imitate during its interaction with humans.
Japan

Nov 2008 — **Grounded Action Segmentation and Association** — 1M JPY
PI — **Global Centre of Excellence Young Researcher Program, Kyoto University** To build and evaluate an unsupervised algorithm for learning interactive behavior both in implicit and explicit nonverbal communication settings.
Japan

Dec 2007 — **Natural Listening for a Humanoid Robot** — 1.5M JPY
PI — **Global Centre of Excellence Young Researcher Program, Kyoto University** To design and implement a learning system that can help the robot achieve natural listening behavior in an automatic way.
Japan

Patents/Patent Applications

JP2026/0000483 (application)
Negotiation Visualization Apparatus, and Negotiation Visualization Method **JP 2026**
A method for visualizing automated negotiation processes to enhance usability and a human-machine interface for negotiation support based on that visualization. (100%)

US 19/095,084 (application)
Negotiation Device, Negotiation Method, and Storage Medium **USA 2025**

JP application (NEC ref. 3270003695), filed 2025-09-05
Matching System, Matching Method, and Program **Japan 2025**
Matching of data providers and data users in an information marketplace (details to follow publication). (co-inventors and share to be confirmed)

US 18/447,264 (application)
Negotiation Protocol, Method and System for Implementing **USA 2025**
A system for adapting automated negotiation strategies for the TAU protocol. (100%)

US 18/317,112 (application)
Negotiation Method Including Selection of Neural Network and System for Implementing **USA 2024**
A system for selecting and using a neural architecture for automated negotiation. (90%)

US 12,086,895 (granted)
Automated Negotiation Agent Adaptation **USA 2024**
Automated negotiation agent adaptation is performed by detecting change in a utility function. (30%)

US 18/005,912 (US20230289908A1); PCT/JP2020/029145
Policy Generation Apparatus, Control Method, and Non-Transitory Computer-Readable Storage Medium **USA 2023**
A method for concurrent negotiation proven to be optimal against opponents with static acceptance models. (100%)

US 17/388,004 (application)
Negotiation Method Including Elicitation and System for Implementing **USA 2022**
A system for negotiation under uncertainty with elicitation-during-negotiation support using the Value of Information concept. (50%)

US 17/184,590 (application)
Adaptive Autonomous Negotiation Method and System of Using **USA 2022**
A new automated negotiation method that can generalize along negotiation domains and opponents. (30%)

JP6838259B2 (granted); app. JP2019-087106
Learning Data Generator, Judgment Device and Program **Japan 2021**
A method for training multiple pipelines of convolutional neural networks to achieve high accuracy in activity recognition. (90%)

JP6754343B2 (granted)
Neural Network Regulator, Device and Program **Japan 2020**
A method for compression of neural networks (convolutional or otherwise) based on novel application of feature selection techniques. (90%)
